

Nouryon Achieves Carbon Neutrality¹ at Five Manufacturing Sites

This achievement supports the company's sustainability agenda, '[Commitment to a Sustainable Future](#)':

By 2030, reduce operational greenhouse gas (GHG) emissions² by
40%
versus a 2019 base year

By 2050,
Nouryon aspires to be a
net zero
organization³

The five carbon neutral sites in Brazil operated by Nouryon (Imperatriz, Eunápolis, Três Lagoas (2) and Jacareí), are part of the company's [Integrated Manufacturing Model](#), offering on-location sodium chlorate and/or chlorine dioxide production.

Nouryon's Integrated Manufacturing Model concept

Modern pulp mills generate excess utilities that can be used as fuel in other manufacturing processes.

- Nouryon uses renewable energy from our customers sourced primarily from biomass.
- Reused resources effectively lower the carbon footprint of the site.
- On-site production reduces transportation requirements.

These five sites have low Scope 1 GHG emissions and reported zero Scope 2 GHG emissions, which has been independently assured⁴ by ERM CVS.

These low, remaining emissions are offset by the purchase of certified⁵ carbon offsets, created from renewable energy projects.

¹ Greenhouse gas (GHG) emissions from our operations (Scope 1) and purchased energy use (Scope 2) in 2021.

² Greenhouse gas (GHG) emissions from our operations (Scope 1) and purchased energy use (Scope 2).

³ The realization of the company's goals on the pathway towards net zero relies on a number of considerations, including site evaluations, increased renewable energy, the rate of innovation, value-chain developments and regulatory requirements.

⁴ External limited assurance completed by independent third-party, ERM CVS. For more information, see <https://www.ermcvs.com>

⁵ Offsets for Scope 1 emissions certified by the Verified Carbon Standard (VCS), administered by Verra, and retired. For more information, see <https://verra.org>

More information can be found in Nouryon's [2021 Sustainability Report](#) and on the Sustainability section of the Company's website: www.nouryon.com/sustainability
